**SpaCom presents comprehensive line of thermal spray and other industrial spare parts.**

May 15, 2006, Seattle, WA. SpaCom, the Spare Part and Component Company, announces the launch of a comprehensive product line of thermal spray spare parts during the International Thermal Spray Conference (ITSC) 2006. The SpaCom exhibit at booth #212 will include some selected samples of its offering which includes spare parts such as nozzles, air caps, electrodes, wire guides and many others for thermal spray equipment from all major manufacturers. "The key advantage of our products is the low cost while maintaining a high level of quality and providing fast delivery and customer service at the same time." says Peter Hanneforth, President and founder of SpaCom. "Based on customer requests we can add any new products to our portfolio, which not only include parts for thermal spray, but also parts and components for various other metal fabrication processes, such as blasting, PTA, welding and others. Whatever the customer needs, we can produce it for him at extremely low prices and ISO 9000 certified quality. We also offer our customers a very

convenient and transparent way of shopping through our online store at [www.spacom.com](http://www.spacom.com). Finally pricing of parts is not a secret anymore."

SpaCom, based in Long Island, NY, is poised to become a global leader in supplying high quality, low cost industrial parts and components, as well as providing reliable contract manufacturing, outsourcing and consulting services, leveraging a network of manufacturing partners in China. "Through our partners in China we have access to hundreds of ISO certified production facilities, manufacturing everything from castings to parts and components to complete machinery at extremely competitive prices. "Due to our low manufacturing cost we are able to offer the lowest prices to our customers and the most generous discounts to our distributors and create value for everyone involved."
